Breath not a Vein, neither yet Phyſick take,
Unleſs thou wilt a breach in Nature make.
Do not encline to Wine, or wanton toys,
Leſt thou deprive thy ſelf of laſting joys.

An Astrologo-Physicial Discourse.

THat the pre-dominion of humours, is the immediate cause of diseases; and that the excitation of these humors, is caused by the various and different Aspects and Positions of the Stars is even by Hippocrates *and* Galen *themselves confirmed. Trust we then to these Rules Astrological, to be observed for the advantage for the sick;*

Let the Sanguine, Cholerick, Phlegmatick, Melancholy *bleed the* ☽ *being in* ♈, or ♊. ♋, or ♐. ♎, or ♒. ♑, ♓, or ♍.

But let her be also in the Aspect of the Fortunate Planets, and seated in a fortunate part of Heaven.

It is good to purge with Electuaries, when the ☽ *is in* ♋; *with Pills, when she is in* ♐; *with Potions, when in* ♍, *because then posited as before directed.*

Vomits are unsafe for all sorts of complexions and constitutions; yet sometimes there is a necessity for them; as when the Distemper lyeth above the stomach; it being impossible for a Purge, or any purgative Medicine *thence to carry it; but when there is an occasion they may be safely taken when the* ☽ *is in* ♉, ♏, *or* ♑ *in any good Aspect of* ♀, ♃, *or* ☉.

Glysters are most conveniently administred, when the ☽ *is in* ♈, ♒, *or* ♏, *posited as before.*

Good to stop Fluxes, or Rheumes, or Issues, when the ☽ *is in any of the Earthly Signs, viz.* ♉, ♍; *or* ♑; *of which experience is a valuable witness.*

Very proper to Bath, when the ☽ *is in* ♋, ♎, ♒, *or* ♐, *in Aspect of* ♀, *or* ♃.

Convenient to cut Hair, the ☽ *being in* ♎, ♑, ♒, *or* ♐, *increasing in Light. And although this be in the opinion of many but a Trivial thing to observe; yet were it more taken notice of by the Gallants of our times, they need not disguise themselves with* Venus *Locks; But they, it may be, esteem it an Honour to be made amends with a part of her, that Originally injured them.*

Medicina a medico; medela ab altissimo.

An

TRIG.

Of the Eclipses which will Happen in this Year 1681.

FOUR Times in this Year 1681. will the Inhabitants of this Earthy Star be deprived of the Light of the two great Luminaries of Heaven, *viz.* Twice of the Sun, and as often of the Moon. But we in these *British Islands*, shall only behold the later Eclipse of the Moon, the other three being invisible to us.

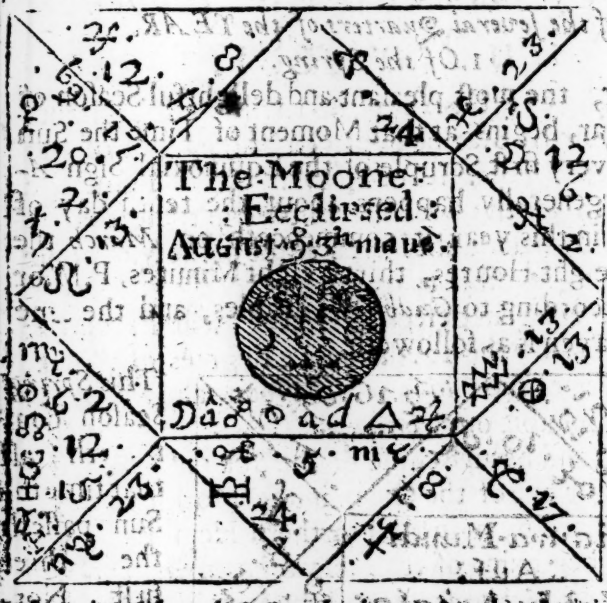
The first Luminarian defect in Order, will be of the Moon. On *February* the 22. day in 15 degrees of *Pisces*, about our eleven of the Clock before Noon, and will be visible to such as inhabit our *Antipodes*.

The Second will be an Eclipse of the Sun on *March* the tenth day, at our one of the Clock in the Morning. *Ergo*, not to be perceived by us in this Northern Hemisphere; it happens in the beginning of the Fiery Sign *Aries*, and will shew it self to our *Antipodes*, as will the former. God bless our Northern Countreys from turbulent Fiery Actions.

The third Luminarian defect will be of the Moon, on *August* the Nineteenth, about our three a clock in the morning in six degrees of the Celestial Fishes. This will be a visible and total Eclipse unto us in *England*; if the Air be clear; and therefore very worthy the pains of those industrious Astronomers among us to observe it. According to the Doctrine of *Alphonsus* and *Appian*, touching the colours of Eclipses, the Moon, while she labours under this defect, will appear of a blackish colour mixed with paleness

The fourth and last Eclipse will be of the Sun, on *September* the second day, at our three a clock in the Morning

in twenty degrees of *Virgo*, it will be inconspicuous to us; and, but a small Eclipse in it self, where most of all visible.



If, as *Almansor* commandsus, we should turn away our Eyes from that Figure, and refuse to look upon it, where *Mars* is posited in an Angle; how much more ought we so to do, from that Figure, wherein *Mars* is not only in an Angle, but in a malicious Quadrate of *Saturn* also; and the Lord of the Seventh, and in the twelfth House, which represents Sorrow, Anguish, Confinement, Imprisonment and Slavery, &c.

Can wholesom Waters from all Fountains flow?

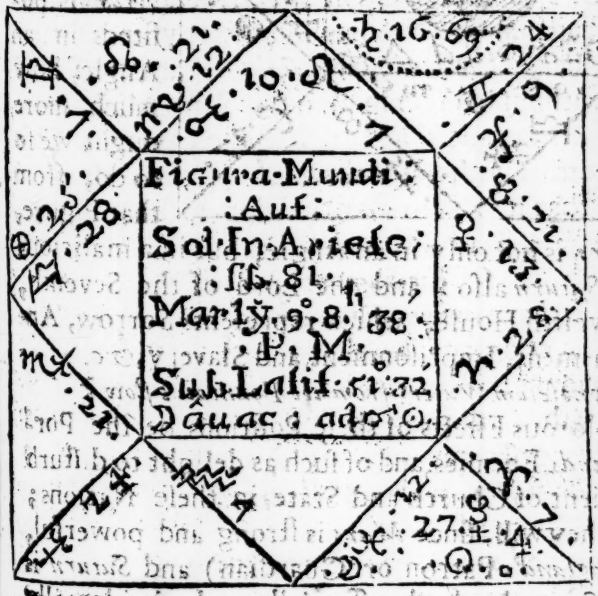
Let the dolorous Effects of these Positions be the Portion of *Englands* Enemies, and of such as delight to disturb the Government of Church and State in these Nations; as assuredly they will, since *Mars* is strong and powerful, (and he is *England's* Patron or Guardian) and *Saturn* is Lord of the Seventh, both essentially and accidentally weak, fully and plainly proving the same. But these matters

matters being likely to be more largely handled by others; I pass all further discourse thereof, and come to speak

Of the several Quarters of the YEAR.

1. *Of the Spring.*

The *Spring*, the most pleasant and delightful Season of the whole Year, begins at that Moment of Time the Sun toucheth the very first Scruple of the Equinoxial Sign *Aries*, which generally happens about the tenth day of *March*, and in this year it commenceth on *March* the ninth day, at eight Houres, thirty eight Minutes, P. M. or Afternoon, according to *Gadbury*'s Tables, and the true Figure of Heaven is as followeth.



This *Spring* Season continueth all that time the Sun passeth the three first Northern Signs, *viz. Aries*, *Taurus*, *Gemini*. At the beginning of this Quarter the Sun makes Days and Nights equal over all the World. And, then leaving the Inhabitants of the Southern Hemisphere, doth begin to refresh and revive

with his cherishing Beams all those that inhabit or dwell in these Northern parts. The Rulers of this Quarter in respect of the aforesaid three Signes, are, according to Astrological Observation, *Mars*, *Venus*, *Mercury*, which Planets have signification of Vigour, Delight and Mutability. And accordingly while the Sun is in *Aries*, all Vegetables shew a Spring-like force; when he is in *Taurus*, Plants and Trees do thrust orth their Leaves and Blossomes after a delightful manner, to Recreate the Souls and Senses of Mankind. When he passeth through *Gemini*, Natures Limners are at work, and Paint to the World Millions of pleasing Varieties, beyond the skill of *Apelles*, *Zeuxes*, *Titian* or *Vandike*, &c. These curious Inmates of the Spring are void of Fraud, and know not the Art of Trepanning, Natures innocent Syrenes tempt none to the Rock of Destruction. *Ulysses* can here sit soberly, and without being bound to his Ships Mast, may delight in such harmless and delectable charms. The Spring presents us with a Witchcraft so pleasing, glorious and divine, that it is sin in Mankind not to be inchanted by it.

2. *Of the Summer-Season.*

THE *Festival* or *Summer*-Quarter begins always where the Spring ends, the Sun then Mounting his *Apogeon* Chair of Honour, is Removed to his greatest distance from the Earth, making to us in these Northern Countreys, largest quantity of Sunshine, and least portion of shadow; or, which is all one, longest days and shortest Nights unto us.

This Season ever begins on the tenth day of *June*, at what time the Sun enters the Tropical Sign *Cancer*, and continues all the while he passeth the three Northern Signes,

Signes, *viz. Cancer*, *Leo*, *Virgo*, and the Grand Ruler thereof are the *Moon*, *Sun* and *Mercury*. The Moon here precedes the Sun in Government, and all the Births of the preceding Springs are now swell'd to a pleasing *Dropsey*, and so continues for the first Month of the *Summer*. And then the Sun assumes a particular (as well as a general) power of Governing, and by his great Heat reduceth all things from their Anasarcal Swelling, to a positive Hectick Feaver, thereby ripening the Seeds of Flowers, Herbs and Fruits. After this excellent Office of the Sun's performing, *Mercury* enters upon the Regency of the last Month of the Quarter, and (*Virgo* being a cold and barren Sign,) he reduceth all things from their Hectical condition, into a direct *Marasmos*. And now all things are ripe for the Sickle, and for the honest Harvest-man's Levelling Hand. And the disease of this Quarter being become thus desperate, its in vain to think to relieve its wasted and decayed spirits by Cordials, or to hope to retrieve its almost worn-out life, by applying Cupping-Glasses, Pigeons, *&c.*

Do you not see how orderly the Seasons of the year are Governed by the several Planets in their Turns; and this according to their Natures and Qualities, as Astrologers have distinguished their Dignities in the several Signes of the Zodiack?

And now, having seen the Death of the Spring and Summer Seasons, the only pleasant and delightful parts of the year; Let us a little in the next place attend their Funerals. Which will be by considering of——

The Autumnal Season or Quarter.

Æquinoxium Autumnale, or the Autumnal or Harvest-Quarter, is the third part of the year, and is the declining

Equinox therein. The Days and Nights are now again equal all the World over; and the Sun doth irradiate the Antique and the Antartique Poles equally, as he did at the beginning of the Spring.

This Season always begins where the Summer ends, *viz.* When the Sun toucheth the first Point of *Libra*, which is ever about the twelfth day of *September*. It continueth all the time the Sun is going through the Signs of *Libra*, *Scorpio*, *Sagittary*, and the Governors of those Signes, are *Venus*, *Mars*, *Jupiter*. — *Venus* bestows her gentle Tears upon the Herse of the deceased Summer, and thereby Generates a *Phœnix* out of the old Ones Ashes; And to for the first of these Months we are made happy with a later Spring, yet not of any long continuance, but quickly fading and abating. Then *Mars* comes next, and endeavors to add Heat to the Humidity that *Venus* lent, the better to cherish the later Summer; but that too is soon returned, by reason of the absence of the Sun, the Fountain of Heat, and grand Principle of Generation. Then, lastly, comes *Jupiter*, and by his Balsamick Beams, endeavors to perfect what *Mars* and *Venus* of themselves could not; and so conserves the Mummial Vertue of all Plants, Herbs, Fruits, Flowers, *&c.* for the good of humane kind, and for the Preservation of the *Species* of all things, at least to the end of this declining Quarter; which is as far as his Gubernation extends. And so he leaves us in the next place to consider of

The Brumal or Winter-Quarter.

The *Winter*-Quarter doth constantly begin where the *Autumnal* Season ends; and, with Astrologers, commenceth when the Sun salutes the first Scruple of *Capricorn*, the Earth being then farthest deflected from the Suns Perpendicular Rays, receiveth greatest Portion of the Shadow, and least quantity of the Sun-shine; and so the causeth shortest days and longest Nights to all those that inhabit on this side of the *Æquator*. The *Sun* is now in his nearest distance to the Earth being at this time opposite to his *Apogæon*, which is in *Cancer*. This Melancholy Quarter continueth all that quantity of time, which the *Sun* is transiting through the Signes of *Capricorn*, *Aquarius*, *Pisces*. The Rulers of this Quarter are *Saturn* and *Jupiter*; but envious *Saturn* power is therein double to that of benefique *Jupiter*, because *Capricorn* and *Aquarius* both, are his Signes

a Mansion-houses. And all things now look with a sad and unpleasant Face, and are seen of all to wear the Image of Death and Destruction. Now Frost, now Hail, black Clouds, Icicles, Barrenness, extremity of Cold, and all things that are Negative to Delight and Pleasure have in this Quarter their Regency.

Thus you see how all the Seasons are made, and by struggling and contending Interests maintain'd; and how that Nature, which is One in it self, is yet pleased with Variety; so that we may truly conclude with *Electra* in *Euripides*, μετάβολη πάντων χλυκύ, *That the Change of all Things is Delectable.* Nay, we may see also, how that at the last *Saturn*, (or Time, χρόνος) is the Devourer of his own Issue; And how *Jupiter* by his gentler moisture in *Pisces* puts us in hope of an approaching Spring. And thus, by this orderly Rule of the Planets by turns, through the several Seasons of the year, we are put in mind of the several parts of our Life, agreeable thereunto, *viz.* How we pass the Spring of our Youth, the Summer of our Manhood, the Autumn of our declining years, and the Winter of our Age. —— Where *Saturn* (or Time) with his Sythe stands ready to cut us down; and how, by passing through this Vale of Misery, this Natural Death, we pass to Immortality, and to a blessed Life, where we shall after all the Troubles and Chances of Mortality, be made Partakers of the Beatifical Vision, and behold God Almighty in Glory. But

Oh! who shall tell! who shall describe thy Throne,
Thou Great THREE-ONE!
There thou thy Self dost in full Presence show,
Not absent from the meaner World below.
No! If thou wert, the Elements League would cease,
And all thy Creatures break thy Natures Peace.
The Sun would stop his Course, or Gallop back;
The Stars drop out, the Poles themselves would crack;
Earth's strong Foundations would be torn in twain,
And this vast Work all Ravel out again
To its First Nothing. —— *Cowley's Davideis. p. 1.*
